ABSTRACT

Previous Calculation Reuse in a Calculator

A method of reusing an expression in a hand-held calculator 100 and corresponding apparatus therefore are described. At least one user-entered expression is received and displayed. The user-entered expression is evaluated and the result displayed. A first user input requesting reuse of one of the previously displayed expressions is received and one of the previously displayed expressions is displayed for editing by the user. A second user input requesting reuse of one of the previously displayed expressions is received and one of the previously displayed expressions is displayed for editing by the user at the same time as the previously displayed expression responsive to the first user input.
