— of inventorship (Rule 4.17(iv))

(54) Title: COMMUNICATION APPARATUSES AND COMMUNICATION METHODS FOR SELECTION AND SENSING WINDOWS FOR NR SIDELINK UES WITH PARTIAL SENSING

Fig. 8

(57) Abstract: The present disclosure provides communication apparatuses and communication methods for selection and sensing windows for new radio (NR) sidelink user equipments (UEs) with partial sensing. The communication apparatuses include a communication apparatus comprising: circuitry which, in operation, determines a first plurality of time resources for resource selection, a second plurality of time resources for resource sensing, and a first subset of time resources from the first plurality of time resources, the first subset of time resources being a selection window for partial sensing, and selects a portion of the first subset of time resources; and a transmitter which, in operation, transmits a sidelink (SL) signal in the selected portion of the first subset of time resources.
