(54) Title: METHOD AND SYSTEM OF WIRELESS COMMUNICATION BETWEEN DEVICES

(57) Abstract: A method and system for wireless communication between devices over the same channel in a Wireless Personal Area Networks (WPANs) environment, and a device capable of wireless communication with other devices over the same channel in a WPANs environment. The method comprises the steps of broadcasting announcements from one or more WPAN control devices; providing in each announcement an announcement portion for announcing information about one or more WPAN control devices other than said respective announcing WPAN control device; and partitioning medium access time for the communication between the devices over the same channel based on the announcements.
