CLAIMS

1. A personal ornament comprises:

an ornament unit;

a frame unit set with a distance from the ornament unit; and

a joint unit jointing the frame unit and the ornament unit at upper part position for a center of gravity of the ornament unit so that the ornament unit swings by vibration.

Claims

1. A personal ornament comprises:

a frame unit;

a jewelry unit which is located inside of the frame

with a distance from the frame unit; and

a joint between the frame unit and the jewelry unit at a position upward of a center of gravity of the jewelry unit so that the jewelry unit swings according to a movement of a wearer of the ornament.

2. A personal ornament as set forth in claim 1 wherein
the joint comprises:
a stick which is set on one of the jewelry unit and the frame unit;
and
a recess unit which joins to the stick and which is set on an other of the jewelry unit and the frame unit.

3. A personal ornament as set forth in claim 1 wherein
the joint comprises:
a first ring unit which is set on one of the jewelry unit and the frame unit; and
a second ring unit which joins to the first ring unit and which is set on an other of the jewelry unit and the inside of the frame unit.

4. A personal ornament as set forth in claim 2, wherein
the stick is fixed to the jewelry unit and
the recess unit is set on the frame.

5. A personal ornament as set forth in claim 2 wherein
the stick is connected by point or line to an under surface
the recess unit.

6. A personal ornament as set forth in claim 1 wherein
the frame unit supports a plurality of the jewelry units at different positions in columns or rows , and
a plurality of the joints of the plurality of the jewelry units make join the frame unit and the jewelry unit at the position upward of a center of gravity of the corresponding jewelry unit.

7. A personal ornament as set forth in claim 6 wherein
the plurality of the joints of the plurality of the jewelry units join the frame unit and the jewelry unit at different positions in columns.

8. A personal ornament as set forth in claim 1 wherein

the plurality of jewelry units are positioned at different positions in columns or rows so that adjacent jewelry units come
in contact to have an influence on swing thereof mutually.

9. A personal ornament as set forth in claim 1 wherein
the joint comprises:

a pair of sticks which are set on one of the jewelry unit and the frame unit; and

a pair of recess units which join to a respective stick and which are set on an other of the jewelry unit and the frame unit.

10. A personal ornament as set forth in claim 1 wherein
the joint comprises:
a pair of first ring units which are set on one of the jewelry unit and the frame unit; and
a pair of second ring units which join to the first ring unit and which is set on an other of the jewelry unit and the frame unit.

11. A personal ornament as set forth in claim 2, wherein the stick is set on one of the jewelry unit and an inner surface of the frame unit facing inside of the frame.

12. A personal ornament as set forth in claim 3, wherein the stick is set on one of the jewelry unit and an inner surface of the frame unit facing inside of the frame.

13. A personal ornament as set forth in claim 1, the jewelry unit is surrounded by the frame unit.

14. A personal ornament as set forth in claim 1, wherein the jewelry unit swings about an axis of rotation, the axis being offset from a center of the jewelry unit in a plan view.

15. A personal ornament as set forth in claim 3, wherein the jewelry unit swings about an axis of rotation, the axis being offset from a center of the jewelry unit in a plan view.

16. A personal ornament as set forth in claim 10, wherein the jewelry unit swings about an axis of rotation, the axis being offset from a center of the jewelry unit in a plan view.
