(54) **Title:** ENCODING/DECODING VIDEO PICTURE DATA

Fig. 11

(57) **Abstract:** When a current block of a video picture is predicted with ITMP mode, a L-shaped templated-based search for a best prediction block of the current block is searched in an already coded, decoded and reconstructed area of the video picture. The present invention determines a first block vector between the current block and the best prediction block and provides interactions between ITMP and IBC prediction modes.
