

ABSTRACT

The present invention provides a use of a paclitaxel cationic liposome in preparation of a drug for treating advanced solid tumors, a use of the paclitaxel cationic liposome and a system therapeutic drug in preparation of a drug for treating advanced solid tumors, and a method for treating advanced solid tumors. A therapeutically effective amount of paclitaxel cationic liposome is administered to patients with advanced solid tumors, or a therapeutically effective amount of paclitaxel cationic liposome and system therapeutic drug is administered to patients with advanced solid tumors.
