

DELEGATED AND RESTRICTED ASSET-BASED PERMISSIONS MANAGEMENT FOR CO-LOCATION FACILITIES

Abstract

At least one user is designated to manage assets including management delegations, access restrictions, and access permissions. Management responsibilities are applied based on business rules and based on a hierarchical model. The hierarchical model enables a well-defined logical flow of delegations and restrictions with pruning capability. User groups, asset groups, asset trees and asset permissions may be defined. The designated user can manage a single asset or all assets or a subset of assets. An asset may belong to one or more asset groups.
