(54) Title: ELECTRONIC SPREAD TRADING TOOL

(57) Abstract: A versatile and efficient electronic spread trading tool to be used when buying and selling comparable commodities either simultaneously or in conjunction with one another. The spread trading tool involves a method of displaying, on an electronic display device, the market depth of a plurality of commodities including an anchor commodity and a non-anchor commodity, where the method includes dynamically displaying a plurality of bids (111, 112) and asks (131, 132) in the market for the commodities, statically displaying prices (121, 122) corresponding to those plurality of bids (111, 112) and asks (131, 132) , where the bids (111, 112) and asks (131, 132) are displayed in alignment with the prices (121, 122) corresponding thereto, displaying an anchor visual indicator corresponding to and in alignment with a desired price level of the anchor commodity, displaying a price level indicator (152, 162) corresponding to and in alignment with a price level of the non-anchor commodity.
