(54) Title: NON-IMMUNOGENIC PRODRUGS AND SELECTABLE MARKERS FOR USE IN GENE THERAPY

(57) Abstract

The present invention provides methods for delivering a gene delivery vehicle to a warm-blooded animal, comprising the step of administering to a warm-blooded animal a gene delivery vehicle which directs the expression of a non-immunogenic selectable marker. Within other aspects, methods are provided for delivering a gene delivery vehicle to a warm-blooded animal, comprising the step of administering to a warm-blooded animal a gene delivery vehicle which directs the expression of a non-immunogenic molecule which is capable of activating an otherwise inactive compound into an active compound.
