

PROCESS OF PRODUCING EDIBLE COCONUT PRODUCTS

ABSTRACT

5

This invention relates to a process of producing edible coconut products, including coconut flour, spreadable coconut butter and concentrated coconut milk. The process comprises grinding desiccated coconut in a grinding apparatus to obtain a first coconut concentrate; further processing the first coconut concentrate in a high speed cutting machine to obtain a second coconut concentrate; and subjecting the second coconut concentrate to centrifugation in a basket centrifuge for a predetermined period of time to obtain a coconut product and a filtrate consisting of cloudy coconut oil. In one embodiment, the coconut product obtained thereto is coconut flour. In other embodiments, the coconut product is further processed to produce spreadable coconut butter and the cloudy coconut oil is further processed to produce concentrated coconut milk.
