(54) Title: VIRTUAL TAPE STORAGE SYSTEM AND METHOD

ACTION

(57) Abstract: The present invention provides a system and method for archiving files to a remote location (110) from a terminal (102) used to select the files to be archived. The remote location at least includes a writable stable memory and a computer. The terminal at least has access to a memory from which the files to be archived may be selected. The terminal and computer are connectable over a long distance telecommunication connection (109) such as an Internet connection. The object of the invention is to provide an improved method and system for archiving files.
