(54) Title: VALVE FOR A BLADDER

(57) Abstract: A valve for an inflatable bladder. The valve includes a body (4) that is adapted to be integrated into the wall (1) of the bladder. The body defines a bore (8) that allows fluid to pass from the interior of the bladder to the exterior or vice versa, and which is adapted to receive a plug (10). The plug is adapted to be moved between a first position within the bore in which the first end of the passageway is in fluid communication with the bore, thereby permitting the passage of fluid, and a second position within the bore in which it is not, thereby preventing the passage of fluid.
