

ABSTRACT

CELL CULTURE FOR TREATING INFLAMMATORY DISEASE

An object of the present invention is to provide a cell
5 culture, a method for producing the cell culture, a kit for
producing the cell culture, a method for treating inflammatory
disease using the cell culture, and the like, for treating
inflammatory disease. A cell culture containing cells derived from
skeletal muscle, a method for producing the cell culture containing
10 cells derived from skeletal muscle, a kit for producing the cell
culture containing cells derived from skeletal muscle, a method for
treating inflammatory disease using the cell culture, and the like
solve the above problem.
