

ABSTRACT**AN APPARATUS FOR CORELESS FILM ROLL**

5 The present disclosure relates to an apparatus (100) or a reusable dispenser
adaptable for mounting coreless stretch film (106) comprising a hollow cylindrical body
(101) with at least one elongated slit (102) along the length of the cylindrical body
wherein, the body has a right portion (107a) and a left portion (107b), and an outer
wall (104) in which at least one of the left or right portion (107a, 107b) is compressed
10 for slotting into an opening of the film roll (106), such that the outer wall (104) mounts
firmly onto inner wall (105) of the opening for grasping the surface of inner sheet of
the film roll during dispensing.
