FIG. 1A

FIG. 1B

FIG. 1CB

(57) **Abstract:** This disclosure is directed to processes of polymerizing olefin monomers to produce polyolefin. The processes include reacting ethylene and optionally one or more olefin monomers in one or multiple reactors in the presence of a catalyst system. The catalyst system includes two or more catalysts, at least one of which is derived from constrained geometry precatalyst according to formula (I) and at least one of which is derived from phosphinimine precatalyst according to formula (V): (I) (V).
