

ABSTRACT

The present invention provides pyrazole derivatives represented by the general formula:

wherein R^1 represents H, an optionally substituted C_{1-6} alkyl group etc.; one of Q and T represents a group represented by the general formula:

or a group represented by the general formula:

while the other represents an optionally substituted C_{1-6} alkyl group etc.; R^2 represents H, a halogen atom, OH, an optionally substituted C_{1-6} alkyl group etc.; X represents a single bond, O or S; Y represents a single bond, a C_{1-6} alkylene group etc.; Z represents CO or SO_2 ; R^4 and R^5 represent H, an optionally substituted C_{1-6} alkyl group etc.; and R^3 , R^6 and R^7 represent

H, a halogen atom etc., pharmaceutically acceptable salts thereof or prodrugs thereof, which exhibit an excellent inhibitory activity in human SGLT1 and are useful as agents for the prevention or treatment of a disease associated with hyperglycemia such
5 as diabetes, diabetic complications or obesity, and
pharmaceutical compositions comprising the same,
pharmaceutical uses thereof, and intermediates for production thereof.
