(54) Title: A SCREEN ASSEMBLY

(57) Abstract

This invention in one aspect relates to a security screen assembly (30) including a frame assembly including a plurality of frame members (32) which are assembled in such a manner that they define an opening which is closed by a sheet of a mesh like material (14). The assembly (30) further includes gripping means (45) adapted to grip an edge portion of the sheet of mesh like material (14) and wherein at least one of the frame members (32) includes retaining means which is adapted to receive the gripping means (45) said retaining means having an opening which does not permit the gripping means to pass therethrough.
