(54) Title: IMPROVED MOBILE DEVICE AND METHOD

(57) Abstract: A method of controlling a mobile communication terminal comprises the steps of sensing (201) a touch on a touch sensitive display, determining (203) a type of implement having provided the sensed touch on the touch sensitive display, where the type of implement is one of at least a blunt type and a pointed type. Depending on the determined type of implement, user interface elements of a first spatial configuration are displayed (207) when the determined type of implement is the pointed type and user interface elements of a second spatial configuration are displayed (209) when the determined type of implement is the blunt type.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
