

ABSTRACT

Embodiments of the present disclosure provide a method, apparatus, device, computer readable storage medium and product for interface display. The method comprises: in response to input information generated in a session interface associated with a first user and at least one second user, a media content acquisition control matching the input information is displayed in the session interface. In response to a first triggering performed by the first user on the media content acquisition control, a media content acquisition interface is displayed, and the input information is displayed in the media content acquisition interface. A target media content generated by the first user in the media content acquisition interface is acquired, and the target media content is sent into the session interface.
