Claims:

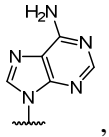

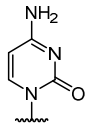

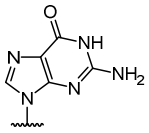

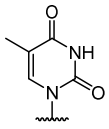

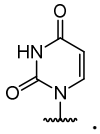

1. An antisense oligomer conjugate of Formula (II):

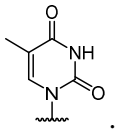

(II)

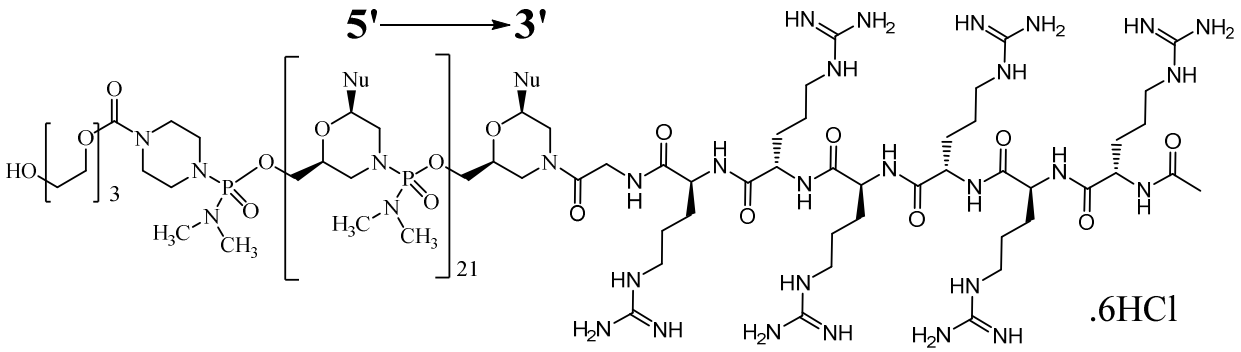

or a pharmaceutically acceptable salt thereof, wherein each Nu from 1 to 22 and 5' to 3' is (SEQ ID NO. 1):

Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu
1	C	6	C	11	C	16	G	21	X
2	A	7	C	12	X	17	X	22	G
3	A	8	A	13	G	18	X		
4	X	9	X	14	G	19	C		
5	G	10	C	15	A	20	C		

and wherein A is , C is , G is , and each X is  or .

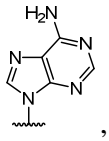

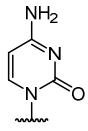

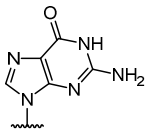

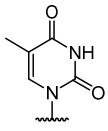

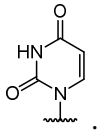

2. The antisense oligomer conjugate of claim 1, or the pharmaceutically acceptable salt thereof, wherein each X is .

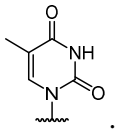

3. The antisense oligomer conjugate of claim 1, or the pharmaceutically acceptable salt thereof, wherein the antisense oligomer is of Formula (IIA):

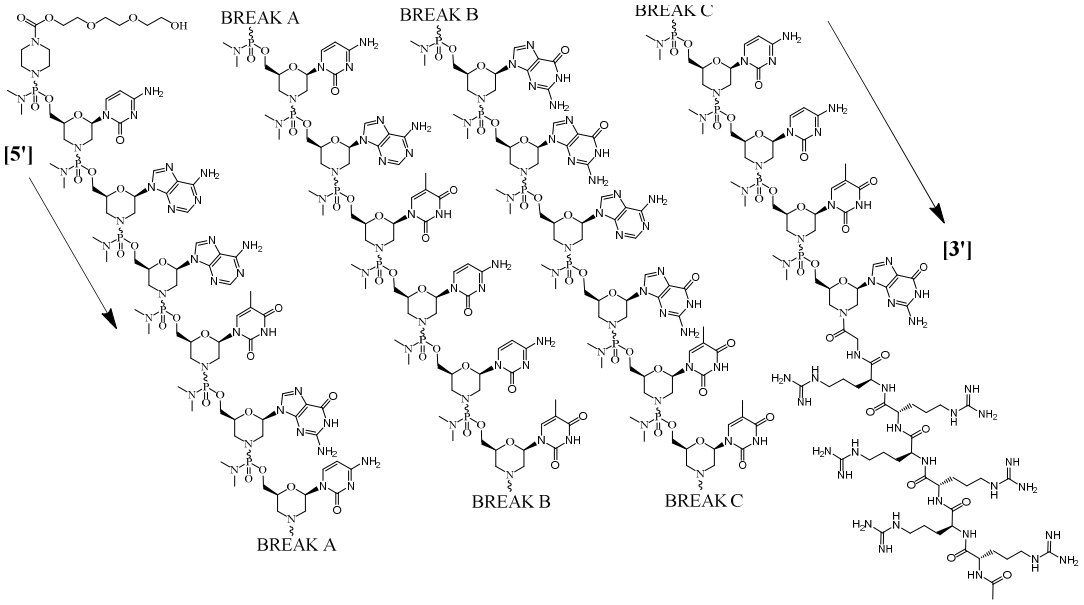

wherein each Nu from 1 to 22 and 5' to 3' is (SEQ ID NO. 1):

Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu	Position No. 5' to 3'	Nu
1	C	6	C	11	C	16	G	21	X
2	A	7	C	12	X	17	X	22	G
3	A	8	A	13	G	18	X		
4	X	9	X	14	G	19	C		
5	G	10	C	15	A	20	C		

and wherein A is , C is , G is , and each X is  or .

4. The antisense oligomer conjugate of claim 1, or the pharmaceutically acceptable salt thereof, wherein each X is .

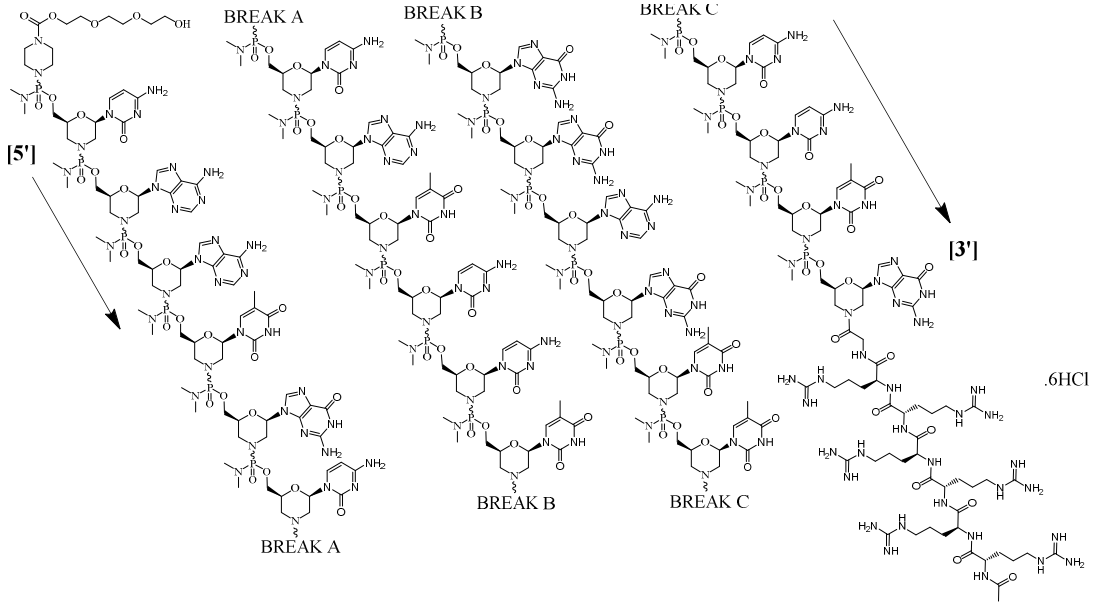

5. An antisense oligomer conjugate of Formula (IV):

(IV)

or a pharmaceutically acceptable salt thereof.

6. The antisense oligomer conjugate of claim 4, or the pharmaceutically acceptable salt thereof, wherein the antisense oligomer is of Formula (IVA):

(IVA).

7. A pharmaceutical composition, comprising an antisense oligomer conjugate of any one of claims 1 to 6, or a pharmaceutically acceptable salt thereof, and a pharmaceutically acceptable carrier.

8. Use of the antisense oligomer conjugate of any one of claims 1 to 6, or the pharmaceutically acceptable salt thereof, in the manufacture of a medicament for the treatment of Duchenne muscular dystrophy (DMD) in a subject in need thereof wherein the subject has a mutation of the dystrophin gene that is amenable to exon 45 skipping.

9. The use of claim 8, wherein the medicament is to be administered weekly.

10. The use of claim 8, wherein the medicament is to be administered biweekly.

11. The use of claim 8, wherein the medicament is to be administered every third week.

12. The use of claim 8, wherein the medicament is to be administered monthly.

13. Use of the antisense oligomer conjugate of any one of claims 1 to 6, or the pharmaceutically acceptable salt thereof, in the manufacture of a medicament for restoring an mRNA reading frame to induce dystrophin production in a subject having a mutation of the dystrophin gene that is amenable to exon 45 skipping.

14. The use of claim 13, wherein the medicament is to be administered weekly.

15. The use of claim 13, wherein the medicament is to be administered biweekly.

16. The use of claim 13, wherein the medicament is to be administered every third week.

17. The use of claim 13, wherein the medicament is to be administered monthly.

18. Use of the pharmaceutical composition of claim 7 in the manufacture of a medicament for treating Duchenne muscular dystrophy (DMD) in a subject in need thereof

wherein the subject has a mutation of the dystrophin gene that is amenable to exon 45 skipping.

19. Use of the pharmaceutical composition of claim 7 in the manufacture of a medicament for restoring an mRNA reading frame to induce dystrophin production in a subject having a mutation of the dystrophin gene that is amenable to exon 45 skipping.

20. Use of the pharmaceutical composition of claim 7 in the manufacture of a medicament for excluding exon 45 from dystrophin pre-mRNA during mRNA processing in a subject having a mutation of the dystrophin gene that is amenable to exon 45 skipping.

21. Use of the pharmaceutical composition of claim 7 in the manufacture of a medicament for binding exon 45 of dystrophin pre-mRNA in a subject having a mutation of the dystrophin gene that is amenable to exon 45 skipping.

22. The antisense oligomer conjugate of any one of claims 1 to 6, or the pharmaceutically acceptable salt thereof, for use as a medicament.
