

ABSTRACT

HERPES ZOSTER mRNA VACCINE, PREPARATION METHOD THEREFOR, AND USE THEREOF

The present disclosure belongs to the technical field of mRNA vaccines, and specifically relates to a herpes zoster mRNA vaccine, a preparation method therefor, and a use thereof. The herpes zoster mRNA vaccine provided by the present disclosure comprises an RNA encoding a varicella-zoster virus gE glycoprotein or a variant thereof. The vaccine can prevent herpes zoster infection and its complications.
