(54) Title: WALL MOUNTED, THREE DIMENSIONAL, VISUAL DISPLAY ELEMENT

Fig. 1

(57) Abstract: A three dimensional visual element is provided which includes a decal or other device to simulate a crack or break within the wall on which the visual elements is mounted. The visual element also includes a functional feature, such as a light, shelf support, electronic device, or the like, so that the visual element also provides some utility. In one example, a three dimensional representation of a soccer ball is provided wherein the soccer ball is surrounded by a clear plastic decal having a cracking pattern so as to represent cracks within the wall on which the device is mounted. Within the shell of the soccer ball in this exemplary embodiment, are lighting elements which allow the device to be used as a nightlight.
