

CHIMERIC ANTIGEN RECEPTORS TARGETING CD70

ABSTRACT

The present invention provides antibodies that specifically bind to CD70 (Cluster of Differentiation 70). The invention further provides bispecific antibodies that bind to CD70 and another antigen (e.g., CD3). The invention further relates to antibody encoding nucleic acids, and methods of obtaining such antibodies (monospecific and bispecific). The invention further relates to the use of the isolated antibodies disclosed herein in the manufacture of a medicament for the treatment of a cancer.
