CLAIMS

1. A storage container of a scrub member comprising a container main body and a lid body engaging with the container main body, wherein

the scrub member is accommodated in an internal portion of the storage container surrounded by the container main body and the lid body,

a ventilation groove which communicates the internal portion of the storage container and an outside of the storage container is formed on an engagement surface where the container main body and the lid body are engaged, and

the container main body has an engagement groove which can be engaged with the scrubbing member.

2. The storage container of a scrubbing member according to claim 1, wherein a plurality of ventilation grooves are formed in the engagement surface.

3. The storage container of a scrubbing member according to claim 1, wherein

the container main body has an annular wall forming a side surface of the engagement groove with an inner wall surface, and

the ventilation groove is formed in an outer wall surface of the annular wall.

4. The storage container of a scrubbing member according to claim 3, wherein

the scrubbing member includes a main body portion having a scrubbing surface and a protrusion protruding from the main body portion toward an opposite side to the

scrubbing surface, and

a top surface of the annular wall is not in contact with the main body portion when the protrusion is engaged with the engagement groove.

5. The storage container of a scrubbing member according to claim 4, wherein the lid body is engaged with the container main body with a gap equal to or smaller than a depth of the engagement groove with respect to the scrubbing surface of the main body portion.

6. The storage container of a scrubbing member according to claim 4 or 5, wherein the lid body has a plurality of protruding portions protruding toward the scrubbing surface of the main body portion.

7. A package of a scrubbing member, comprising:

the storage container of a scrubbing member according to any one of claims 1 to 6; and

an oxygen absorbent disposed outside the storage container.
