(1) Liposomal or viral delivery of gene for exogenous enzyme
(5) Systemic administration of innocuous prodrug which is taken up into target cell
(2) Entry of vehicle to cell by receptor-mediated uptake or endocytosis
(4) Gene expression and enzyme production
(6) Conversion of prodrug to cytotoxic agent
(3) Delivery of therapeutic gene to nucleus of target cell
(7) Diffusion of active drug to cell nucleus causes direct killing of transduced cell
(8) Spread of active drug to adjacent untransduced cells causes bystander effect
