ABSTRACT

The disclosure discloses a method, an apparatus, an electronic device and a readable storage medium for displaying an identifier, and relates to the technical field of electronic devices. The method for displaying an identifier includes: displaying a first identifier on a session interface; and updating the first identifier to be a specific identifier based on a session operation of at least two session objects in the session interface and displaying the specific identifier, wherein a type of the specific identifier matches with a type of the session operation, the at least two session objects are objects participating in a session in the session interface, and the specific identifier represents an interactive operation relationship associated with the session.
