(54) Title: SYNERGISTIC PERMEATION ENHANCERS FOR GASTROINTESTINAL SYNTHETIC EPITHELIAL LININGS

FIG. 1H

(57) Abstract: The disclosure relates to synthetic linings for the gastrointestinal (GI) tract, "Gastrointestinal Synthetic Epithelial Linings" or "GSELs," which can modulate absorption of drugs, nutrients, and other substances in the GI tract, and synergistic combinations of permeation enhancers to aid in such absorption. A GSEL is a temporary lining on the inner surface of the lumen of the GI tract, keeping its active agent (e.g., drug, nutrients, or other substances) in intimate contact with the GI mucosa such that the active agent can be absorbed over long periods of time.
