(54) Title: WELL FLOW CONTROL WITH ACID ACTUATOR

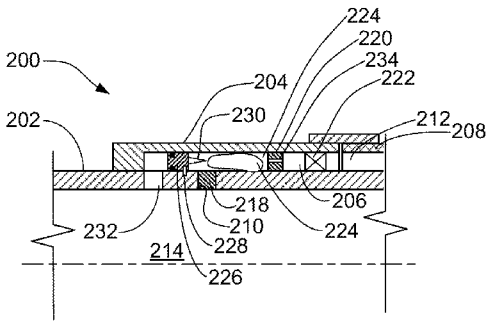

FIG. 2

(57) Abstract: A well production device includes a production tubing with a fluid passage between the exterior of the tubing and a center bore of the tubing. A fluid barrier is provided sealing the fluid passage. The device has a chamber comprising a dissolving fluid adapted to dissolve the fluid barrier when in contact with the fluid barrier and an actuator configured to release the dissolving fluid into contact with the fluid barrier in response to a signal.
