

ABSTRACT**“Apparatus and Method”**

- 5 A valved tree member (50) for inclusion in a riser completion system (35) and suitable for use in the region of a moon pool (14) on a floating vessel (8), the valved tree member (50) comprising:-
- one or more valve members (70) adapted to selectively permit and prevent flow of fluid therethrough, and
- 10 one or more moveable stab members (76) adapted to respectively selectively provide a sealed fluid communication path between a throughbore of the riser system and the one or more valve members (70). A telescoping device (60) and a flow diverter member (66) for inclusion in the riser completion system (35) are also provided, as well as a riser completion system (35) incorporating the valved tree
- 15 member (50), the telescoping device (60) and the flow diverter member (66).
