(54) Title: DEVICE AND METHOD FOR OPHTHALMIC EXTRACTION AND INJECTION

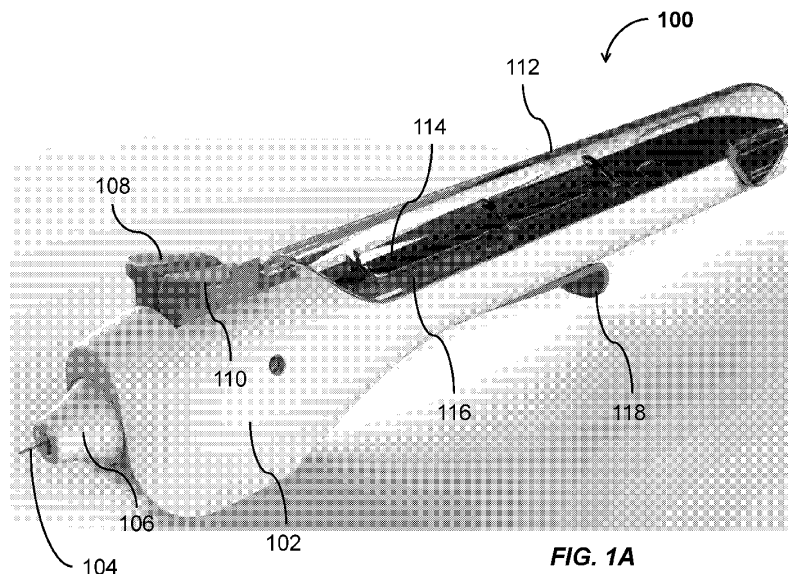

FIG. 1A

(57) Abstract: A device and method for ophthalmic extraction and injection are disclosed. The device includes a housing comprising: an injection portion configured to receive an injection source; an extraction portion configured to receive an extraction source; a priming mechanism configured to simultaneously prime both the injection source and the extraction source; a needle selectively in fluid communication with the injection source or the extraction source; wherein on activation of the extraction source, the device is configured to extract a sample through the needle, and on activation of the injection source the device is configured to inject an agent through the needle.
