(54) Title: INHIBITORY RNA TARGETING HUNTINGTIN EXPRESSION

FIG. 2A

(57) Abstract: The present invention features RNA polynucleotide constructs comprising sequences targeting Huntingtin mRNA, polynucleotide constructs comprising a sequence encoding for such RNA constructs, and primary microRNA scaffolds. Constructs comprising sequences targeting Huntingtin mRNA and/or encoding for sequences targeting Huntingtin mRNA can be used, for example, for inhibiting mutant HTT expression and/or treating Huntington disease.
