

ABSTRACT

The invention relates to a reinforcement element (12) for a diaphragm wall including a reinforcement cage (18), the reinforcement
5 element further including a seal-carrier (30) provided with a mounting
part (32) for receiving at least one seal (14), which is elongated, the seal-
carrier (30) being fixed to the first end part of the reinforcement cage (18)
and extending along the longitudinal direction (A) of said reinforcement
cage, the seal-carrier defining a housing (36) for receiving the seal (14),
10 at least a first part (14a) of which is surrounded by a sacrificial material
(16).
