(54) Title: HOSE BURST CONTAINMENT BLANKET

FIG. 1

(57) Abstract: A protective blanket (10) which can be wrapped loosely around a hose (52), fastening the longitudinal edges (12a; 12b) together to form a protective cylindrical tube, and/or joined end-to-end with one or more additional blankets to extend the protective tube to a desired total length. The blanket thus provides improved safety to personnel and the environment by shielding a hose under pressure to block leaks and by containing or channeling test fluids and cleaning fluids.
