(54) Title: POLY(ALLYL ETHER)S OF POLYCYCLOPENTADIENE POLYPHENOL

(57) Abstract: Embodiments include poly(allyl ether)s of polycyclopentadiene polyphenol that can be obtained by allylation of a polycyclopentadiene polyphenol, where the aromatic hydroxyl group(s) (-OH) are converted to $\text{HR}^1\text{C}=\text{CR}^1\text{-CH}_2\text{-O-}$ and/or $\text{H}_2\text{R}^1\text{C-CR}^1=\text{HC-O-}$, where R^1 is as described herein. Embodiments also include thermosettable compositions including the poly(allyl ether)s of polycyclopentadiene polyphenol and products obtained by curing the thermosettable compositions.
