(54) Title: SYSTEMS AND METHODS FOR PRESENTING VISUAL INTERFACE CONTENT

(57) Abstract: A method for presenting visual interface content comprising adjunct visual interface content during application program execution, and the adjunct visual interface content provides visual information associated with application program execution. The method comprising displaying the adjunct visual interface content using a first interface, displaying the adjunct visual interface content using a second interface, and displaying the updated adjunct visual interface content on the at least one of the first and second interfaces based on actuation of the first and second interfaces.
