(54) Title: STACKED LAYERED ABSORBENT PRODUCTS

**(57) Abstract**

The present invention provides an absorbent article which includes a first absorbent article and a second absorbent article releasably secured to one another. The second absorbent article is folded along its longitudinal edges to provide side flaps which are releasably secured to the garment facing surface of the first absorbent article.

(54) Title: ABSORBENT ARTICLE HAVING A REWET BARRIER

**(57) Abstract**

The present invention provides an absorbent article having a rewet barrier. The absorbent article includes a liquid pervious topsheet, a liquid impervious backsheet joined to the topsheet, an absorbent core positioned between the topsheet and the backsheet, a fibrous acquisition layer positioned between the topsheet and the absorbent core, and a rewet barrier positioned between the fibrous acquisition layer and the absorbent core. The rewet barrier is an apertured, macroscopically expanded, three-dimensional polymeric web having a body facing surface and a garment facing surface.
