Claims

1. Use of a nasal medicinal composition containing the hexapeptide tyrosyl-D-alanyl-glycyl-phenylalanyl-leucyl-arginine or its pharmaceutically acceptable salt, in the manufacture of a medicament, for the treatment of acute respiratory viral diseases (ARVI).

2. The use of the nasal medicinal composition according to claim 1, wherein the disease is influenza.

3. The use of the nasal medicinal composition according to claim 1, wherein the pharmaceutically acceptable salt is tyrosyl-D-alanyl-glycyl-phenylalanyl-leucyl-arginine diacetate.

4. The use of the nasal medicinal composition according to claim 1, wherein the nasal composition is prepared in the form of a spray containing, as the active ingredient, the hexapeptide tyrosyl-D- alanyl-glycyl-phenylalanyl-leucyl-arginine or its pharmaceutically acceptable salt at the weight percentage of 0.01 % to 3 % and excipients making up the rest.

5. The use of the nasal medicinal composition according to claim 4, wherein the composition contains the hexapeptide tyrosyl-D-alanyl-glycyl-phenylalanyl-leucyl-arginine or its pharmaceutically acceptable salt and excipients at the following ratio of the ingredients in mass%: hexapeptide: 0.01-3 %, with water making up the rest.

6. The use of the nasal medicinal composition according to claim 4, wherein the composition contains the hexapeptide tyrosyl-D-alanyl-glycyl-phenylalanyl-leucyl-arginine or its pharmaceutically acceptable salt and excipients at the following ratio of the ingredients in mass %: hexapeptide: 0.01-3 %, sodium chloride 7-11 %, with water making up the rest.

7. The use of the nasal medicinal composition according to claim 4, wherein the composition contains the hexapeptide tyrosyl-D-alanyl-glycyl-phenylalanyl-leucyl-arginine or its pharmaceutically acceptable salt and excipients at the following ratio of the ingredients in mass %: hexapeptide: 0.01-3 %, sodium chloride 7-11 %, benzalkonium chloride 0.1-0.2 %, with water making up the rest.

8. The use of the nasal medicinal composition according to claim 1, wherein the composition contains, as excipients, sodium chloride and water at the following ratio of the components in mass %: sodium chloride 9 %, water 90 %.

9. The use of the nasal medicinal composition according to claims 5-8, wherein the composition contains, as water, water for injections or purified water.
