(54) Title: ELECTROLYTIC CELL EQUIPPED WITH MICROELECTRODES

*Fig. 1*

(57) Abstract: The invention relates to an electrolytic cell equipped with microelectrodes for the generation of un-separated products and the method for obtaining it. The cell and the microelectrodes of the present invention are obtained using a technology for the production of microelectromechanical systems (MEMS). The anodic and cathodic microelectrodes have an electrocatalytic coating and are mutually intercalated at an interelectrode gap lower than 300 micrometres.
