(54) Title: COLLOBORATION SPACES

(57) Abstract: A computer implemented method and system enable users to create a social network providing access to other users. By providing access to such networks *via* a visual presentation (600), the system renders content available for access by other network members (620). Access is sometimes provided through propagation of metadata or other uniquely identifying indicia associated with the social network to all or at least certain other network members.
