(54) Title: BALLISTIC VEST

FIG. 4

(57) Abstract: A ballistic vest includes a carrier and at least two ballistic panels supported in the carrier, including a front ballistic panel and a back ballistic panel. The carrier is made from at least two layers of material including an outer layer and an inner layer that are joined to each other at the top and bottom of the vest and that are substantially open at the sides. The two carrier layers define between them a panel space in the carrier. The front panel has a lower section that is substantially free to move laterally in the panel space. The back panel has a lower section that is substantially free to move laterally in the panel space.
