(54) Title: SEATING SUPPORT SYSTEM

FIG. 1

(57) Abstract: A table and seating arrangement (10) includes a table (12) and seats (22) positioned along at least one edge of the table. The seats define a cavity, at least a portion of the cavity (36) having a non-circular cross-section. A frame (14) supports the seat and the table and includes a seat support (24). The seat support has a non-uniform cross-section including a lower section having a substantially circular cross-section and an upper section having a non-circular cross-section inserting into the cavity of the seat. A caster or glide element (50) mounts to a bottom end of the lower section of the seat support.
