(54) Title: HEART VALVE REPAIR DEVICES

(57) Abstract: A valve repair device for repairing a native valve of a patient. The valve repair device includes a paddle, a gripping member, and an indicator. The paddle and/or the gripping member are movable to form an opening or capture region between the gripping member and the paddle. The indicator is configured to indicate whether a leaflet of the native valve is inserted into the opening or capture region between the paddle and the gripping member to at least a minimum insertion depth.
