(54) Title: SIGNAL PROCESSING METHODS AND APPARATUSES, AND DEVICE AND STORAGE MEDIUM

(54) 发明名称: 一种信号处理方法、装置、设备及存储介质

- 101a Acquire carrier frequency information of at least two carrier frequencies configured by a network device
102a Acquire positioning signal resources corresponding to the carrier frequencies configured by the network device
103a Send a positioning signal on the basis of the carrier frequency information of the at least two carrier frequencies and the positioning signal resources

(57) Abstract: The present disclosure belongs to the technical field of communications. Provided are signal processing methods and apparatuses, and a device and a storage medium. A method comprises: acquiring carrier frequency information of at least two carrier frequencies configured by a network device, wherein the carrier frequencies are used for the transmission of a positioning signal; acquiring positioning signal resources corresponding to the carrier frequencies configured by the network device; and sending the positioning signal on the basis of the carrier frequency information of the at least two carrier frequencies and the positioning signal

resources. In the present disclosure, a method for configuring a positioning signal based on multiple carrier frequencies and a method for reporting a measurement report are provided with regard to a multi-carrier-frequency scenario, thereby solving the technical problems of "how to configure a positioning signal based on multiple carrier frequencies and how to report a measurement report".

(57) 摘要: 本公开提出一种信号处理方法、装置、设备及存储介质, 属于通信技术领域, 该方法包括: 获取网络设备配置的至少两个载频的载频信息, 所述载频用于传输定位信号; 获取网络设备配置的各个载频对应的定位信号资源; 基于所述至少两个载频的载频信息和定位信号资源发送定位信号。本公开针对于多载频场景, 提供了多载频的定位信号的配置方法和测量报告的上报方法, 从而解决了"多载频的定位信号如何配置以及如何上报测量报告"这一技术问题。
