(54) Title: A URINE SAMPLE COLLECTION DEVICE

(57) Abstract: A urine sample collection device comprising a urine receptor having an outlet aperture, a generally elongate tubular member extending from said receptor outlet aperture to an open end, the tubular member having an opening (21) formed in the side thereof, a coupling means (5') for releasably mounting a urine collection container, the coupling means having a passage extending therethrough which meets said opening whereby urine can flow from the tubular member into a mounted container, and a flow director (24) located at or adjacent said opening and formed to direct urine past the opening.
