

TITLE OF INVENTION: ADAPTOR FOR ELECTRONIC COMPONENT
TESTING HANDLER

【ABSTRACT】

5 The present invention relates to an adaptor for an
electronic component testing handler. According to the
present invention, the adaptor for an electronic component
testing handler includes parts capable of appropriately
grasping electronic components having various manufacturing
10 tolerances and bending. According to the present invention,
the adaptor can appropriately grasp the electronic component
with a manufacturing tolerance and bending generated in the
manufacturing process of the electronic component, so that
the electronic component is electrically connected accurately
15 to a tester, thereby improving the reliability of the handler.
