

PATENT APPLICATION

Title : A DEVICE FOR INJECTING GROUT

Inventor : PUVILLAND Bernard

Applicant : COMPAGNIE DU SOL

A B S T R A C T

The invention relates to a device for injecting material in the form of a suspension into a cavity (10).

5 The device comprises an injection tube (26) for injecting said material, the tube having a coupling first end (26a) and a second end that is open; a coupling (20) has a cylindrical portion (22) provided with an axial bore having a coupling first end for coupling to the first end

10 of said tube, and a second end, said coupling further comprising a radial stub (24) for coupling to a feed pipe (32) for feeding material in suspension; a vent hose (28) is engaged in said tube and in said coupling, said hose having a first end (28a) projecting from the second end

15 (26b) of the tube and a second end that projects from the second end of the coupling; and a sealing piece (30) for establishing sealing between the second end of said coupling and the outside wall of said hose.
