

TRANSMISSION METHOD, SYSTEM, AND RELATED APPARATUS

ABSTRACT

This application discloses a transmission method, a system, and a related apparatus. This application relates to the field of satellite communication. A first satellite network device generates a first data packet, and sends the first data packet to at least one first terminal device within a specified time period by using a second satellite network device. The specified time period is obtained through negotiation between the first satellite network device and the at least one first terminal device.
