

Clamping chuck

Abstract

5 The invention relates to a clamping chuck (1) for clamping pallets (30) furnished with a clamping spigot (31). The clamping chuck (1) has a locating opening (5) for the clamping spigot (31) and a clamping device for clamping the clamping spigot (31) in the locating opening (5). A plurality of sensors (9, 10) are arranged on the clamping chuck (1), by means of which the clamping force actions on the clamping
10 spigot (31) may be determined as well as other values. The clamping chuck (1) is equipped with a transmitter (25) for wireless transmission of parameters detected by means of the one or more sensors (9, 10).
