(54) Title: PANEL WITH HIDDEN ATTACHMENT MEANS

(57) Abstract: A panel (10) comprising a plurality of first members (11) disposed in a first direction, at least some said first members defining a first part of a passageway, at least one second member (12) disposed in a second direction and includes at least one passage portion (13) defining a second part of the passageway, the second member (12) having a plurality of openings for at least partially receiving a said first member (11), and at least one elongate locking member (14), adapted to pass through the passageway, wherein the passage portion (13) has a periphery (15) which extends at least partially about the elongate locking member (14), with at least one opening (16) in a wall of the periphery (15) to allow adjustment of the elongate locking member (14) as it passes through the passage portion (13).
