(54) Title: SYSTEMS AND METHODS FOR DISTRIBUTED ELECTRONIC SIGNATURE DOCUMENTS

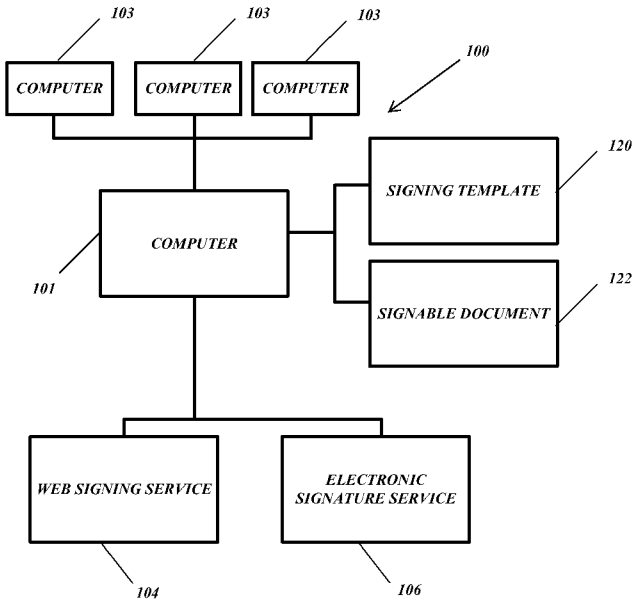

FIG. 1

(57) Abstract: Systems and methods for providing a report describing the status of an electronic envelope. The electronic envelope includes a first electronic document to be distributed for electronic signature and an electronic signing template defining a set of at least one task that must be performed by an executor of the first electronic document to complete the electronic signature. The first electronic document is subject to a workflow including a plurality of events. The method includes receiving from a monitoring entity a selection of an identifier of an event of the plurality. The progress of the first electronic document through the workflow is monitored. That the at least one event has occurred with respect to the first electronic document is determined. In response to determining that the at least one event has occurred, the monitoring entity is notified of such.
